

Sustainability 101: Strategising, Implementing & Reporting Workshop ©

Designed and Organised by:

Beyond compliance and disclosure requirements on CSR & Sustainability, the bigger challenge for organisations has been to embed processes, systems and best practices to define and meet various economic, environmental & social (EES) targets and aspirations.

How do you arrive at and articulate your business case for sustainability? How do you align your existing CSR policies and sustainability efforts to national priorities and global goals? What is impact and how do you measure and report it with credibility? How do you benchmark global / regional indices?

“Sustainability leadership needs systemic thinking and a positive change in the way we conduct business, create value and report impact...”

Date: To be confirmed
Venue: Mandarin Oriental, Kuala Lumpur

Course Objective

This training will focus on practical understanding of sustainability in practice; and identifying & meeting EES targets & aspirations, towards creating value & reporting impact.
